House a Home***

simfer

www.tafani.ae

We care about the future and respect the nature.

Energy Efficiency: Save energy and money by choosing an energy-efficient cooker.

Family is our top priority, and everyone in the family is safe.

Oven Safety Lock: It locks display functions, preventing accidental activation or modification of the settings.

Easy to Clean: The inner walls of the oven feature special enamel plates. The enameling is interspersed with so-called catalytic particles which cause predominantly fat deposits to be distributed over the enamel at temperatures starting from 180°C.

Low-E Glass: Low-Emissivity glass (Or Low-E glass as it is commonly referred to) is a type of energy-efficient glass designed to prevent heat escaping to the cold outdoors.

Flame Failure Safety Device: For added peace of mind, the flame failure safety device shuts off the gas if the flame becomes accidentally extinguished while cooking.

Induction Child Lock: The child safety lock safely prevents unintentional switch-on.

Steam Cleaning: Using this technology, you can easily clean your oven cavity. Put water into the tray and place your tray at the bottom level of your oven and set the operation knob. After the process, simply wipe away the residues using a soft cloth.

Easy to Remove Full Glass Oven Door: Full glass inner door making your cooker easy to clean with a single wipe.

90 cm Built-In Ovens

SMF908BOE-DT - ELECTRIC

Functions

Features

- Control Panel: Stainless Steel
- Front Door: Tempered Black Glass
- Oven: Electric (2000W)
- Grill: Electric (1500W)
